You can find more Photoshop resources at www.adobe.com/resources. Understanding the new look of Photoshop CS6 Photoshop CS6 is a lot like old-school Photoshop and the other Adobe programs. The user interface has changed only slightly, but many new features have been added, such as the new Camera Raw, Lens Correction and Perspective correction features. The features in this chapter can be used with the older versions of Photoshop as well, but some features, such as the Content-Aware options, are available only in Photoshop CS6. The new Camera Raw tool is a prerequisite for using many of the features in this chapter and more than one of the most popular features I discuss later in this chapter. * * * For help using Photoshop in a Windows environment, see Chapter 19. * * * Figure 2-1 is a screen shot of a section of the control panel when you're in the Photoshop workspace and opening a file from your computer's hard drive. **Figure 2-1:** The new PS CS6 control panel layout. Understanding Photoshop's work area The Photoshop workspace has undergone some changes. You can read about the old workspace in Chapter 3 of this minibook, but the new layout offers several new features: • Toolbox: The toolbox is now part of the workspace instead of being a floating panel. The new workspace appears to the right of the tools shown in Figure 2-1. The new tools include the following: New Selection tool: Selects an object and makes it transparent. Paths tool: Draws lines on the canvas. Figure 2-1 shows the new Paths tool, which is just below the Selection tool. Hand tool: Allows you to draw custom shapes. New Document panel: Allows you to save, create, and close files. Options/Presets panel: Contains numerous options and presets for advanced users. • Navigator panel: The Navigator panel, shown in Figure 2-1, replaces the Backstage, shown in Figure 3-1. The new panel enables you to view a file while you edit it, even though the file is on your computer. The image in Figure 2-1 shows the Navigator in a state of editing. The Navigator is also shown in Figure 3-1; it enables you to view the image while editing it. New concepts in the Photoshop workspace: Under

Bitcoin is a digital currency that can be used to pay for goods and services on the Internet. It also serves as a payment system for online merchants as it is less expensive than other payment methods such as credit cards, checks, and money orders. Bitcoin is the world's first decentralized digital currency and the first known use of the term "cryptocurrency." It is also the first known use of the word "blockchain." In contrast to other digital currencies, Bitcoin is not regulated by a central bank or other authority. Instead, it is decentralized in that decisions about how the Bitcoin network is operated are made by anyone using Bitcoin. The concept of Bitcoin began as a private idea invented by an unknown person using the pseudonym, Satoshi Nakamoto, who published the Bitcoin white paper in 2008. In 2010, Satoshi turned on the Bitcoin network's first block, which started the creation of the blockchain and the Bitcoin token, a 16-digit number that is linked to every Bitcoin in existence. Bitcoin's transparency makes it an ideal transaction tool for everyday use. For example, it is easy to see exactly where the money in any Bitcoin transaction ends up. For example, the money you are sending to a Bitcoin wallet on the Internet is sent to a wallet on your computer. The wallet is controlled by a software program that is locked to your identity, so sending money can be as easy as entering your Bitcoin wallet's private key into the input box. Bitcoin is currently the world's most widely-traded cryptocurrency, and its monetary value has fluctuated widely from less than $0.01 per Bitcoin in 2010 to more than $3,000 in 2017. Though the value of Bitcoin dropped significantly in 2018, it has since recovered. For this reason, Bitcoin is often referred to as a "digital gold" or "digital currency." How Does Bitcoin Work? In terms of how Bitcoin works, it is similar to a paper currency except that it can't be printed by the federal government. Instead, the currency is digitally created and registered on a distributed ledger called the blockchain. This ledger is a record of all the transactions that have occurred in the currency. It is also a unique type of public ledger that records transactions electronically, which allows a timestamp and the transaction amount. It is similar to a database but for money. Anyone can participate in the creation of the blockchain. This is 05a79cecff

18 Brushes Brushes in Photoshop are divided into 9 different categories: Airbrushes, which are ideal for fine detail. Brush Effects, which alter the colors and detail of an image and are good for retouching. Brush Pens, which draw lines or create shapes. Border Brushes, which allow you to draw borders on any object or place on the image. Brush Tools, which can be used to transform or resize objects and places in the image. Brush Tips, which allow you to paint with different materials, such as different sizes and textures of paint. Brushes, which apply different effects to an image Burn Brushes, which lighten or darken parts of an image. Gradient Brushes, which can create gradients or brighten or darken an image, depending on how you use them. Mask Brushes, which allow you to hide areas of the image. Some brushes are large and others small, and the blades can have varying thickness. 19 Filters Filters in Photoshop allow you to apply effects to an image quickly. There are some filters that work very well together. You should combine effects you want before applying them to an image. You can then use the Filter > Filter Gallery option to sort through the different filters. Here are some common filters and their uses: Blur: You can use the blur filter to blur or soften the edges of an object, object or image. Contrast: A contrast filter lets you adjust the contrast of an image. This lets you make images brighter or darker, depending on what you want. Colorize: Choose from a variety of different colorize filters. For example, if you like the vintage look, you can choose the add vintage color filter. Desaturate: If you prefer, you can use the desaturate filter to make an image grayscale or black and white. Dissolve: You can apply a dissolve filter to create an image that is half or whole image. Erosion: You can use the erosion filter to smooth the edges of an image. This is great for tidying up imperfect edges. Hue/Saturation: This filter lets you change the colors and saturation of an image. Lighten: Choose the lighten filter to make the image lighter or darken it. Opacity: This filter lets you control the opacity of an image.

Quilt Pricey but worth it, this quilt was created by a long-time friend using my applique and quilting pattern. I embroidered the sides of the quilt for added depth. Size Standard, made using Kona cotton and long-staple rayon. Pockets I prefer to make the standard quilt without pockets. If you would like pockets, you can add them on the back of the quilt. Just add a strip of fabric between the layers of the back.OMG, I just love Miley's new haircut!!!!!! I have been following her through her transformation in her blog and on instagram but I love the new style. Don't you think Miley should take a look at Perez Hilton's new haircut? I know Miley is an expert on fashion but all I could think about when I first saw Perez's cut was "haha he looks like he has a giant comb up his ass!" and it was just a little bit funny. What do you think of Perez's cut? I agree with you that Miley would be an expert on fashion with everything she has done in the past but I still think she would be just as good if not better with a haircut like this. Miley is such a talented woman, and I agree with you that she would do a great job with any style of hair or style. I don't think that she would ever go against her gut feeling and not try something new. She's been getting the same haircut for a long time, but what's right is right. I love that Perez got a haircut with a comb up his ass like a man! LOL. He must've been ticked off at his wife or girlfriend for looking so ridiculous. LOL You are totally right. I definitely would like to see Miley try something new. She's always going to be known for her blonde hair, and it is definitely her most attractive feature. She could easily pass a glamour magazine shoot with that hair. OMG, I just love Miley's new haircut!!!!!! I have been following her through her transformation in her blog and on instagram but I love the new style. Don't you think Miley should take a look at Perez Hilton's new haircut?
